

1st semester 2016/2017

7th October

15h00-16h00
Salão Nobre

Toward Cognitive Integration of Prosthetic Devices

José Carlos Príncipe

Distinguished Professor, BellSouth Teacher, University of Florida
and Director of Computational NeuroEngineering Laboratory

17th October

13h00-14h00
Room QA1.2

NanoBiomaterials for Neurosciences: Challenging the Neuronal Barriers

Ana Paula Pêgo

Principal Investigator of nanoBiomaterials for Targeted Therapies Group
(nBTT), INEB and I3S Porto

7th November

13h00-14h00
Room QA1.2

Non-invasive brain stimulation

Pedro C. Miranda

Researcher at Institute of Biophysics and Biomedical Engineering (IBEB),
and Associate Professor, Faculty of Science University of Lisbon (FCUL)

28th November

13h00-14h00
Room QA1.2

Cystic Fibrosis: Molecular and Functional Basis for Personalized Diagnosis and Therapeutics

Margarida Amaral

Director of BioISI, and Full Professor of Biochemistry/ Molecular Biology,
Faculty of Science, University of Lisbon (FCUL)

5th December

13h00-14h00
Room QA1.2

Delta One T cells: towards a new cellular immunotherapy for cancer

Bruno Santos

Group Leader at IMM Lisboa and Associate Professor at
Faculty of Medicine, University of Lisbon (FMUL)

12th December

13h00-14h00
Room QA1.2

Crossing over the boundaries of biology and chemistry to drive discovery in fungal pathogenicity and ecology

Cristina Silva-Pereira

Group leader, ITQB, New University of Lisbon (NOVA)
